

A truly diversified investment strategy also takes into consideration the impact of taxes both today and when we reach retirement.

The graph below shows the level of national debt vs. the highest marginal tax rate from 1915–2021. Over the past 107 years, tax rates have largely tracked national debt, with slight variations for the ideology of the political party in power. If history is any indication, this could mean a large jump in tax rates for high income earners.

Given history, where do you think tax rates are heading?
